ABSTRACT OF DISCLOSURE

A system and method for automatically evaluating a decisional rule containing a task and a condition which must be fulfilled before the task can be performed and for automatically performing the task when or whenever the condition is fulfilled in which a decisional rule is entered into computing means, parsed, and then processed such that automatic and continuing iterative evaluations of whether the condition is fulfilled are provided until the condition is fulfilled and then the task associated with the decisional rule is automatically performed and whereby further processing is resumed only after the condition is fulfilled.
